

We asked people in custody about their reasons for not being vaccinated, and many said they had heard a lot of myths and conspiracy theories about COVID-19 and vaccinations. We also asked about how they would like to get information, and many said they like to read comic strips. So we created this one to bust some of the common myths we heard. We hope this helps you make a more informed choice about whether or not to get vaccinated.

Here is Where We Got Our Info
